

GROUNDS REPORT
JUNE, 2004

The primary activity for this reporting period was the refurbishing and cleaning of the deck. Many thanks to Buddy Roberts and Keith Frost for their hard, hot work on this project.

A portion of the deck remains to be pressure cleaned and then will be water sealed. Other routine activities included watering and weeding.

Our neighbors behind the church reported that a large pine tree on church property was recently struck by lightning. I checked on this and found that the tree will eventually fall across the access road to these houses. It is in fact a very large tree and will need to be taken down by a tree service.

We have received a request for the use of our property for parking for a wedding party at our neighboring church across Park Road on the afternoon of Saturday, June 26.
