Subject: GROUNDS REPORT JULY/AUGUST 04

The usual summertime activities of watering, weeding, mulching, and deadheading have been conducted during this period. Special attention to the grounds was given prior to the Bisop's visit. Representatives from three tree services will be at St Alban's over the next few days to give prices for removal of the large pine tree struck by lightning. I checked withour insurance company and found that this would be covered, but our deductible is \$500.
