

# VESTRY REPORT

## GROUNDS

APRIL, 2004

The primary activity for the past month has been in preparing the grounds for Easter. A work day was held on March 20, and several volunteers worked on the grounds. Shrubbery was pruned and beds were weeded and mulched. Additional work was done on the Saturday before Easter. The bed around our brick sign was cleaned out and rejuvenated by planting a number of Dianthus plants which had been bought by the brotherhood for the Seder.

During the month, repairs were also made to the lawn sprinkler system.

A major project in the near term (prior to Vacation Bible School) will be making minor repairs to the deck and then cleaning and water sealing it.
